SUDOKU WEEKLY
## Week 1, 2019

Explanation

The solution to a sudoku is a special kind of **magic square**: In each row and in each column the entries add to the same number, in this case, 45.

Only the digits 1,2,3,4,5,6,7,8 and 9 may be used and all nine digits have to appear on each row and in each column. In addition, each of the nine 3×3 blocks that make up the sudoku should also contain these nine digits.

The sudoku itself is a puzzle in which only a few of the digits are given. To solve the puzzle, all missing digits should be reconstructed. A proper sudoku is designed in such a way that it has only one unique solution.

This booklet contains only a special brand of Sudokus named **magic sudokus**. In this type, each puzzle contains one or more gray blocks. These small blocks have a property similar to the suduku in which they occur: Each row and each column adds to 15 and all nine digits should be present in the block.

WEEK 1

Monday

					7			9
			4	6		1		
5			9			2		
								7
7		4						
	6		8	1				
	5				2			3
8	3		5	7	4	9		

WEEK 1

Tuesday

9				5				
	2						7	
						1		
		6				4		
3		2						
	3	4				6		
8				7				
	6						5	8

WEEK 1

Wednesday

					8			
	8		4		3		9	
					7			
					9			6
1		4						
3			6	8				
							1
