No part of this Price Booklet may be reproduced, stored in a retrieval system or transmitted, in any form or by any means, electronically, mechanically, photocopying, recording, or otherwise, without the prior written consent of the publisher. The publisher and authors state that they have compiled this Price Booklet carefully and to the best of their knowledge, however no warranty or representation is made as to the accuracy or completeness of the information contained in this publication. The publisher and authors assume no liability whatsoever for any damage resulting from the use of this Price Booklet or its contents. The information is not to be used in isolation and the publisher recommends that independent verification of the information should be made.

INTRODUCTION

We take pride in presenting the 32th edition of the DACE Price Booklet. It has been edited by DACE in cooperation with Vakmedianet in Alphen aan den Rijn, The Netherlands. DACE cost information can be accessed online on www.dacepricebooklet.com. This requires a one-time registration using the unique activation code on page 2.

Vakmedianet takes the responsibility for production, marketing and distribution, while DACE is responsible for content. Cost information is collected by the Special Interest Group CEPI (Cost Engineering Process Industry). Just as in former editions, the authors have compiled this information with the utmost care. Budget prices have been established from judgement of the actual costs of recently completed projects. The useful value of this document might possibly increase if users' wishes can be taken into account. In case you have any remarks or suggestions for the lay-out, completeness, ease of use or otherwise, we kindly invite you to inform Vakmedianet (kosteninformatie@vakmedianet.nl). For questions regarding the content of the DACE Price Booklet, please contact the DACE office (info@dace.nl).

DACE Cost and Value:

The Dutch Network and Knowledge Center for Cost Engineering and Value Management.

DACE is an organization in which some 130 companies participate. These companies operate in the Dutch process industry and infrastructure industry. Cost engineers and value managers from these companies participate in the DACE networking meetings, the Special Interest Groups, and in other events. All activities focus on building an effective and efficient network of cost engineers and value managers. Visit www.dace.nl for more information.

Nijkerk, The Netherlands

DACE Cost and Value

The Dutch Network and Knowledge Center for Cost Engineering and Value Management.

DIRECTIONS FOR USERS

For what purpose can the DACE Price Booklet be used?

Provided costs (prices) are applicable within the process industry; intended to be used for budget reasons, or for comparing alternative project implementation methods. Costs are not suitable for definitive estimates or benchmarking purposes. If for example, large quantities are used then special discounts are often possible on the listed prices.

How to use this DACE Price Booklet?

All prices are:

- Applicable within the process industry;
- Intended to be used for budget reasons, or for comparing alternative project implementation methods;
- Not suitable for definitive estimates or benchmarking purposes;
- Based on West European construction method, cost level based on The Netherlands;
- Budget prices, exclusively for the use of cost estimation and comparison of costs for alternative methods of execution based on wide accuracy range, and not suitable for definitive estimates;
- Expressed in Euros and exclusive of VAT;
- Based on the price level 2nd quarter 2017, unless stated otherwise;
- Exclusive of usual trade discounts, granted to industrial users, unless stated otherwise;
- Exclusive of special discounts while ordering larger quantities;
- Generally depending on various details such as accepted risk profile (ALARP), shape, quality or type, whilst for the sake of larger quantities special discounts are usually possible;
- Related to activities, carried out by contractors or installers, assuming a process industry HSE profile;
- For activities performed by contractors, based on a normal market situation;
- Assuming a normal market situation.

Dimensions are indicated in millimeters, any deviations are clearly stated.

Generally the SI Unity system is used.

For which region and which year are the pricing levels the basis in the DACE Price Booklet?

These budget costs are for West European circumstances and based on the 2Q2017 pricing level.

Could DACE provide additional details or clarifications of existing pricing tables?

If you see opportunities to improve specific tables, or notice discrepancies, then please provide us with feedback. Upon receipt we shall evaluate your input, and will do our best endeavor to incorporate these possible improvements in the next DACE Price Booklet release. Please contact us at info@dace.nl

Is it possible to initiate and add new cost tables?

Yes, we recommend new ideas and opportunities. Please submit an email to info@dace.nl, including sufficient back-up, and DACE will contact you within 2 weeks.

Some tables do not include costs, e.g. B4002, E0001, F0001. Could you explain the objective of these tables?

The content of these general sections is to clarify the subsequent cost tables.

We see some discrepancies in costs/prices of previous DACE Price Booklet editions. Is it possible to update the older Price Booklet editions or provide clarifications of these previous editions?

Unfortunately we cannot and will not re-issue previous Price Booklet editions. The intention is to continuously improve the content of this booklet and to incorporate learning's within new released editions.

DIRECTIONS FOR USERS

Could you describe the cost-data collection process including DACE responsibility for new DACE Price Booklet editions?

DACE consists of a large group of volunteers – originating from owners/operating companies, EPC engineering companies and construction contractors within the process industry - who are providing cost input. DACE acts as a facilitator, and is performing some high level process checks on the information received.

Note:

DACE, nor the publisher, do except any form of liability for damage resulting from the use of information provided by means of the "DACE Price Booklet". Cost should not to be used in isolation and the publisher strongly recommends independent verification of key information critical to final use.

What is the background of the indexes outside The Netherlands listed in table H5002?

These indexes are derived from outside organizations such as "ChemieTechnik (Germany)" and "Chemical Engineering (USA)".

What is the background of the Dutch indexes listed in table H5003?

These indexes are derived from the CBS (refer to www.cbs.nl Statistics Netherlands for more details), except series "30" and "32" (refer to www.bouwkosten.nl – for additional details) and "60" (Webci composite index) is a combined index for a process installation built in The Netherlands.

I bought the booklet, where can I get my online subscription?

Please navigate to "register and activate" on www.dacepricebooklet.com and provide the activation code, you will get the online booklet on your profile.

What tables are added in this edition?

The tables F4025 "Sustainable measures, architectural work" and F5011 "Sustainable measures, building services" are added in this edition.

F4025 Sustainable measures, architectural work consists of price information about Wall Insulation, Floor Insulation, Roof Insulation, Window Insulation and Sun Blinding. F5011 Sustainable measures, building services consists of price information about Energy Production, Free Chilling and Combined Heat and Power. F5011 consists of price information about sustainable measures from architectural work and F5011 about sustainable measures from building services.

TABLE OF CONTENTS

A PROCESS EQUIPMENT	15
A1 Static process equipment	15
A1001 Atmospherical cylindrical storage tanks	15
A1002 Vertical storage tanks	16
A1003 Vertical silo's aluminium or AISI 304	17
A1004 Vertical silo's in plastic material	18
A1005 Cylindrical vessels with hemispherical head	19
A1006 Columns	20
A1007 Internals	21
A1008 Filling	21
A1009 Carbon steel heat exchangers	22
A1010 Stainless steel heat exchangers	22
A1011 Combination carbon steel and stainless steel heat exchanger	23
A1012 Plate heat exchangers	23
A1013 Graphite heat exchangers	24
A1014 Basket strainer	24
A1015 Filter presses	24
A1016 Plate filters	25
A1017 Candle filters	26
A2 Mechanical process equipment	27
A2001 Vacuum drum filters	27
A2002 Horizontal vacuum filters for intermittent vacuum	27
A2003 Horizontal vacuum filters for continuous vacuum	28
A2004 Water purification plant	28
A2005 Single-stage centrifugal pumps, 1,450 rpm	29
A2006 Single-stage centrifugal pumps, 2,900 rpm	30
A2007 Single-stage screw compressors	31
A2008 Centrifugal fans	31
A2009 Root-blowers	32
A2010 Small mixing vessels	32
A2011 Mixing vessel with jacket	33
A3 Transportation equipment	34
A3001 Elevators	34
A3002 Belt conveyors	35
A3003 Screw conveyors	36
A3004 Extra for screw conveyors drive	36
A4 Utilities	37
A4001 Boiler plants	37
A4002 Water treatment plants	37
A4003 Cooling water-recirculation-unit	37
A4004 Air compressor installation	37
A4005 Instrument air-compressor unit	38
A5 HVAC equipment	39
A5001 Central heating unit	39
A5002 Cooling unit	39
A5003 Low pressure ventilation system	39
A5004 Options for low pressure ventilation system	40
A5005 Ventilating air purification plant	40

TABLE OF CONTENTS

B PIPING MATERIAL	41
B1 Pipe and fittings	41
B1001 Seamless steel pipes acc ASME/ANSI, (Std) (40)	41
B1002 Carbon steel flanges and fittings by ASME/ANSI, (Std)	42
B1003 Seamless steel pipes by ASME/ANSI, (XS)	43
B1004 Carbon steel flanges and fittings by ASME/ANSI, (XS)	44
B1005 Welded stainless steel pipes	45
B1006 Stainless steel fittings	46
B1007 Hard PE pipe (HPE-80)	47
B1008 Hard PVC pipe	48
B1009 Glass fibre reinforced epoxy pipe (GRE)	48
B1010 Fittings and flanges for glass fibre reinforced epoxy pipe (GRE)	49
B2 Ducting en chimneys	50
B2001 Spiral fabricated pipe	50
B2002 Fittings for spiral piping	51
B2003 Square shaped air ducts	52
B2004 Insulation for square shaped air ducting	52
B2005 Chimneys	52
B3 Valves and appendages	53
B3001 Ball valves, ANSI, cast iron	53
B3002 Ball valves, ANSI, AISI 316	53
B3003 Check valves, ANSI	54
B3004 Butterfly valves, ANSI	54
B3005 Plug valves, ANSI, straight model	55
B3006 Membrane valves with female thread connection, BSP	55
B3007 Membrane valves with flange connection	56
B3008 Gate valves, type full bore	56
B3009 Gate valves, type reduced bore	57
B3010 Safety valves and pressure relief valves	57
B3011 Rupture disc holders and rupture discs	58
B4 Complete delivered and installed piping systems	59
B4001 Complete assembled underground piping system	59
B4002 Specifications for complete fabricated and installed piping	60
B4003 Complete assembled piping system ANSI 150 lbs	60
B4004 Complete assembled piping system ANSI 300 lbs	61
B4005 Complete fabricated and installed jacketed pipe	61
B4006 Steam tracing, spiral wound or parallel tracing, sched 80	62
B4007 Complete fabricated and installed stainless steel piping, DIN PN 10, AISI 304L	63
B4008 Complete fabricated and installed stainless steel piping, DIN PN 10, AISI 316L	63
B4009 Specifications for complete installed pipe systems with victaulic couplings	64
B4010 Specifications for complete installed piping with victaulic couplings	64
C PAINTING AND INSULATION	65
C1 Painting	65
C1001 Surface treatment	65
C1002 Painting on steel	65

TABLE OF CONTENTS

C2 Insulation	66
C2001 Thermal insulation of equipment	66
C2002 Method of measurement for equipment insulation	67
C2003 Thermal insulation on piping	68
C2004 Surcharges for cold insulation and sound	69
C2005 Examples insulation thickness	69
D ELECTRICAL	71
D1 Energy supply	71
D1001 Electric power generation (rotating)	71
D1002 Emergency power supply (static) 3 x 400 V / 230 V	72
D1003 Emergency power supply (static) 3 x 400 V	73
D1004 Emergency power supply (static) 230 - 240 V	73
D1005 Emergency power supply (static) 3 x 400 - 415 V	74
D1006 High and low voltage underground electrical power cables	75
D1007 Cable connections and joints for high- and low voltage underground cables	76
D1008 Low voltage signal underground cables	76
D1009 Cable ends and joints for low voltage underground cables	76
D1010 Prefabricated transformerstation	77
D1011 High voltage switch installation	77
D1012 Standard transformers, 10 kV to 400 V, oil cooled	78
D1013 Standard transformers, 10 kV to 400 V, cast resin dry type	78
D1014 Standard transformers, 20 - 30 kV to 10 kV	79
D1015 Standard transformers, 20 kV to 400 V	79
D1016 Low voltage switch in enclosure	80
D2 Energy conversion	81
D2001 Electrical power installation	81
D2002 Motor control center (MCC)	81
D2003 Motor control switch (MCS)	81
D2004 Low voltage power cables YMvK in existing cable trays or conduits	82
D2005 Cables for control and signals, YMvK	83
D2006 Cable junction box for cables YMvK (signal and control)	83
D2007 Low voltage motor, EEx n	84
D2008 Price factor rpm/electrical power for low voltage motor EEx n	84
D2009 Low voltage motor, EEx e	85
D2010 Price factor rpm/electrical power for low voltage motor EEx e	85
D2011 Low voltage motor, EEx d	86
D2012 Price factor for low voltage motor EEx d	86
D2013 Connecting low voltage motors	87
D2014 Temperature class low voltage motors	87
D2015 Variable frequency converters	87
D2016 Sockets outlets	88
D2017 Lighting fixtures	89
D2018 Lighting poles	89
D2019 Electrical heat tracing	89
D2020 Installation of fiber optic cable	90
D2021 Fiber optic interconnecting cable joint	90
D2022 Fiber optic cable, cable end connection	90

A PROCESS EQUIPMENT

A1 Static process equipment

A1001 Atmospherical cylindrical storage tanks

Horizontal or vertical tanks.

PVC-polyester

PVC polyester with glass fibre reinforced, approximately 70% glass.

Design with spherical head.

Polyester

Full polyester.

Including:

- Manhole with cover;
- Several nozzles.

Variation: Different L/D relations do have an impact on price while having the same volume.

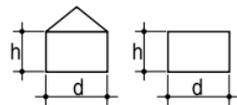

Content in m ³	Cost each (x 1,000)	
	PVC-polyester	Polyester
1	13.-	13.-
5	18.-	16.-
10	20.-	19.-
20	26.-	24.-
40	33.-	28.-
60	39.-	34.-
80	50.-	39.-
100	62.-	47.-
200	91.-	85.-
300	118.-	99.-
400	145.-	129.-

A PROCESS EQUIPMENT

A1 Static process equipment

A1002 Vertical storage tanks

A

Material: Carbon steel.

Type: Cone roof or floating roof.

Including:

- 1 Outside cage ladder;
- 2 Manholes;
- Several nozzles;
- Hand railing;
- Assembly on site.

Excluding:

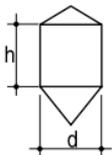

- Internals;
- Civil work, painting and insulation.

Design	Volume in m ³	Height (h) in m	Diameter (d) in m	Total surface area in m ²	Weight (x 1,000 kg)	Cost each (x 1,000)

A PROCESS EQUIPMENT

A1 Static process equipment

A1003 Vertical silo's aluminium or AISI 304

Material: Aluminium or AISI 304.

Type: Conical roof or flat roof, conical bottom, cone angle 90°.

Design pressure: +0.20/-0.02 bar.

Design temperature: 60 °C.

Bulk density: 500 kg/m³.

Wall thickness: Average wall thickness of the cylindrical shell.

Price and weight are including:

- Skirt;
- Manhole;
- Several nozzles;
- Cage ladder in carbon steel;
- Handrail in carbon steel;
- Platform in carbon steel.

Excluding:

- Transport and installation;
- Foundation;
- Structural steel.

A PROCESS EQUIPMENT

A1 Static process equipment

A1004 Vertical silo's in plastic material

A

Material: Glass reinforced plastic (polyester).

Type: Spherical roof, conical bottom, cone angle 60°.

Design pressure: +0.20/-0.02 bar.

Design temperature: 60 °C.

Bulk density: 500 kg/m³.

Including:

- Skirt;
- Manhole;
- Several nozzles;
- Cage ladder;
- Handrail;
- Platform.

Excluding:

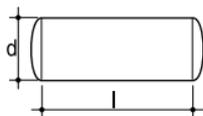

- Transport and installation;
- Foundation;
- Structural steel.

Content in m ³	Height (h) in m	Diameter (d) in m	Cost each (x 1,000)
10	4.9	1.9	8.20
20	5.9	2.4	9.20

200	18.9	4.0	60.70

A PROCESS EQUIPMENT

A1 Static process equipment

A1005 Cylindrical vessels with hemispherical head

Horizontal or vertical vessels.

Including:

- Supports;
- X-ray;
- Inspection;
- Blasting in- and outside;
- 1 Manhole;
- Maximum 9 nozzles;
- Painting outside;
- Reinforcement rings if necessary.

Excluding:

- Heat treatment.

Variation: Different L/D relations do have an impact on price while having the same volume.

14			6,205.-	8,865.-

A1015 Filter presses

Material plates: Plastic (polypropylene).

Working pressure: 6 bar.

As from 20 m² with automatic plate transport.

Nett filtering surface in m ²	Cost each
2	14,350.-
5	16,300.-
7	18,100.-
10	19,600.-
20	35,750.-
30	43,300.-
50	59,650.-
100	102,250.-

A PROCESS EQUIPMENT

A1 Static process equipment

A1016 Plate filters

Working pressure: 6 bar.

Working temperature: Up to 120 °C.

Material plates: AISI 316.

Nett filtering surface in m ²	Cost Each	
	Material filter housing	
	Carbon steel	AISI 316
2	16,900.-	23,650.-
5	18,300.-	25,700.-
7	21,250.-	32,750.-
10	24,600.-	39,050.-
20	30,050.-	49,500.-
30	36,550.-	60,200.-
50	48,550.-	76,600.-
100	90,150.-	134,800.-
